Table of contents

**Preface** ................................................................. 19

**Introduction** .......................................................... 21

1. The idea of the book. 2. General characteristics of the School. 3. The logical-mathematical and the psychological-semiotic branches of the School. 4. The range of the School and membership criteria. 5. Restrictions. 6. The structure of the book. 7. Authors’ motives and intentions. 8. The state of work.

**Chapter one. Conceptions of philosophy in the Lvov-Warsaw School** ........... 32

**Part one. Conceptual distinctions** .................................................. 32

1. The conception of philosophy. 2. Philosophical disciplines. 3. Discipline *versus* branch of philosophy. 4. Philosophy *versus* science. 5. Philosophy *versus* particular sciences. 6. The interdisciplinarity *versus* intradisciplinarity of philosophical research. 7. Philosophy as a science, the problem of demarcation, the meaningfulness of philosophical problems, and the place of philosophy in the classification of sciences. 8. Philosophy *versus* worldview. 9. Philosophical tradition. 10. The condition of philosophy and the social role of philosophers.

**Part two. Fragments** ............................................................ 40

A. Kazimierz TWARDOWSKI. 1. Philosophy as a group of disciplines. 2. Pragmatic and historical concept of philosophy. 3. Philosophy *versus* other disciplines; psychology *versus* humanities. 4. The domain of metaphysics. 5. Philosophical view of the world. 6. Faith and knowledge. 7. Personal worldview *versus* scientific beliefs. 8. The social role of the philosopher. 9. Philosophy *versus* particular sciences. 10. Polish philosophy.

B. Władysław WITWICKI. 1. The need for philosophy. 2. Psychology – the basic philosophical discipline. 3. Criteria of scientificity. 4. Science *versus* art.

D. Zygmunt ZAWIRSKI. 1. The indispensability of metaphysics. 2. General philosophy as a theory of reality. 3. Metaphysics *versus* scientific synthesis. 4. The indeterminacy of scientific metaphysics. 5. Metaphysical hypotheses and the criteria for their selection.

F. Tadeusz KOTARBIŃSKI. 1. The intellectual formation of the LWS. 2. Three concepts of philosophy. 3. Academic philosophy. 4. Philosophy seeking the meaning of life. 5. Philosophy as a theory of knowledge. 6. The motto of small philosophy.
G. Władysław TATARKIEWICZ. 1. The object of philosophy. 2. Branches of philosophy. 3. Philosophy and philosophical sciences. 4. The natural, scientific, and philosophical image of the world.

H. Tadeusz CZEŻOWSKI. 1. Ideal of a philosopher. 2. Scientific philosophy as a theory of science. 3. Multitude of metaphysical constructions. 4. Permissibility of various metaphysical constructions.

I. Maria OSSOWSKA. 1. Dependences between sciences. 2. Borderline issues.

N. Izydora DĄMBSKA. 1. The intellectual formation of the LWS. 2. Necesse est philosophari. 3. Philosophy’s non-reducibility to the theory of science.

O. Maria KOKOSZYNSKA. 1. Philosophy as the theory of the language of science. 2. Extension of the concept of philosophy as the theory of scientific language – by semantics. 3. The penetration of metaphysics into science.

## Chapter two. Concepts of logic in the LWS. ........................................ 96

### Part one. Conceptual distinctions ............................................................... 96

### Part two. Fragments ..................................................................................... 103

A. Kazimierz TWARDOWSKI. 1. Logic as a science of the truthfulness of judgements. 2. Logic versus psychology. 3. Artifacts as the object of logic’s research. 4. Logistic versus combinatorics.

B. Władysław WITWICKI. 1. Algebraic logic versus philosophical logic. 2. Warsaw logicians.

C. Jan ŁUKASIEWICZ. 1. Psychologism as a source of the fall of logic. 2. The object of logic. 3. The apriorism of logic. 4. Critical assessment of philosophical logic. 5. Mathematical logic as a continuation of ancient logic. 6. The relation between logic and philosophy. 7. Autonomy of mathematical logic. 8. Philosophical implications of logic. 9. Limits of the application of logical methods. 10. Logic in Poland.
Chapter three. Concepts of method and methodology in the LWS. 145

Part one. Conceptual distinctions ....................................................... 145

Part two. Fragments ........................................................................... 153

A. Kazimierz TWARDOWSKI. 1. The concept of a research method. 2. Three kinds of research methods. 3. The failure of inductive metaphysics. 4. The distinction between actions and their products – as a basis for typology of sciences. 5. Discovering versus justifying. 6. Pseudo-a-priori theories.
Chapter four. The postulate of clarity of speech in the LWS ....... 194

Part one. Conceptual distinctions ................................................. 194
1. Initial formulation of the postulate of clarity of speech. 2. Actions and products. 3. A communicative situation. 4. Language. 5. Categorial structure of an expression. 6. Semantic function

**Part Two. Fragments**

- B. Władysław Witwicki. 1. “Literally” and “logistical” clarity. 2. The indispensability of the relativization of clarity. 3. Sources of a judgement’s unclearness. 4. Clarity versus truthfulness. 5. Psychological and linguistic understanding. 6. Clarity of thought versus unclarity of speech.

- C. Jan Łukasiewicz. 1. Clarity and exactness. 2. The fight against error and inexactness. 3. Logic as a measure of exactness.

- D. Zygmunt Zawirski. 1. Provisorium in science. 2. The ideal of absolute truth.

- E. Stanisław Leśniewski. 1. Clarity and incomprehensibility. 2. The criterion of clarity.

- F. Tadeusz Kotarbiński. 1. Types of obscurity: unclearness, indistinctness and instability. 2. Hypostasizing. 3. Ambiguities and nonsenses. 4. Semiotic defects of utterances as the cause of philosophical controversies. 5. The postulate of avoiding resp. removing statements burdened with semiotic defects. 6. Methods for neutralizing semiotic defects.

- G. Władysław Tatarkiewicz. 1. The genesis of scientific language. 2. Clarity. 3. Distinctness. 4. Unabiguity. 5. Simplicity.

- H. Tadeusz Czeżowski. 1. Clarity of speech, and clarity of thought. 2. Clarity of knowledge, and unclearness of faith.

- I. Maria Ossowska. 1. Conceptual frameworks of psychology. 2. Clarity versus axiological disputes.

- J. Kazimierz Ajdukiewicz. 1. Types of inexactness of expressions. 2. Thought muddle. 3. Difficulty or lack of understanding. 4. Clarity versus accessibility of text.

- K. Alfred Tarski. 1. Clarity and explanation. 2. Exactness of research and clarity of description.

- N. Izydora Dąmbaska. 1. The clarity and suitability of language. 2. The concepts of understanding.

Chapter five. The postulate of appropriate justification in the LWS. 237

Part one. Conceptual distinctions ................................................. 237

Part two. Fragments ........................................................................... 248

A. Kazimierz TWARDOWSKI. 1. Ways of cognition: irrational and rational. 2. Obviousness as a criterion of truthfulness. 3. Internal experience and its obviousness and inaccessibility to others. 4. A priori and a posteriori science. 5. The issue of justifying the norms.

B. Władysław WITWICKI. 1. A researchers’ duty. 2. The concept of reasoning. 3. Sincere and insincere convictions.

D. Zygmunt ZAWIRSKI. 1. Positivistic program. 2. So-called revolutions in science.

E. Stanisław LEŚNIEWSKI. 1. Semantic intuition and language conventions. 2. Intuition in deduction.

F. Tadeusz KOTARBIŃSKI. 1. Inference and deriving. 2. Implicational consequence and inferential consequence. 3. Justification of norms.

G. Władysław TATARKIEWICZ. 1. Judgements that do not need to be justified. 2. Obvious judgements.

H. Tadeusz CZEŻOWSKI. 1. The discovering, justifying and expounding of knowledge. 2. The analytical and experimental methods. 3. Types of empiria. 4. Reasonings.

I. Maria OSSOWSKA. 1. Criticism as a component of civic attitude. 2. Evaluation versus observational sentence.

K. Alfred TARSKI. 1. Truthfulness in a deductive system. 2. Provability of theses in a deductive system. 3. Psychological and formal proof. 4. Definitions in formalized systems.
L. Janina KOTARBIŃSKA. 1. The explaining of phenomena and the explaining of laws. 2. The status of metaphysical hypotheses.

N. Izydora DĄMBSKA. 1. Analysis of irrationalism. 2. Irrationalism in science. 3. Reasoning based on analogy.

O. Maria KOKOSZYŃSKA. 1. Absolute and relative justification. 2. The illusion of apriorism.

Chapter six. The postulate of diligent exchange of thoughts in the LWS... 288

Part one. Conceptual distinctions ................................................................. 288

Part two. Fragments .................................................................................... 293

B. Władysław WITWICKI. 1. Conference and private discussions. 2. The rules of a diligent discussion.

C. Jan ŁUKASIEWICZ. 1. Cooperation and inspiration. 2. Reactions to criticism.

D. Zygmunt ZAWIRSKI. 1. The source of problems in discussions. 2. Consultations with the master.

E. Stanisław LEŚNIEWSKI. 1. Criticism and construction. 2. The polemical genesis of mereology.

F. Tadeusz KOTARBIŃSKI. 1. Praxiology and eristic. 2. Reliable discussion versus clarity and appropriate justification. 3. Temporary terminological regulations. 4. Destructive and protective criticism.

H. Tadeusz CZEŻOWSKI. 1. Theoretical and practical discussions. 2. Requirements imposed on theoretical discussions. 3. Striving for clarity versus the charge of unclearness. 4. Impartiality in scientific disputes.

I. Maria OSSOWSKA. 1. Interdisciplinary discussions. 2. Constructive replica.

K. Alfred TARSKI. 1. Research seminars. 2. Trouble with authorship. 3. The meanders of the filiation of ideas.

L. Janina KOTARBIŃSKA. 1. Areas of philosophical discussion. 2. The balance of optimal discussion.
CHAPTER SEVEN. ANALYSIS OF CONCEPTS IN THE LWS ............ 315

Part one. Conceptual distinctions ................................................. 315

Part two. Fragments ................................................................. 326

I. Maria OSSOWSKA. 1. Values of scientific work. 2. Analysis of concepts, judgements and norms. 3. Logic versus grammar. 4. Examples and distinctions. 5. Assessment concepts.

J. Kazimierz AJDUKIEWICZ. 1. Concept as meaning of a name. 2. Analysis: intuitions. 3. Logical analysis versus lexicographic analysis. 4. The role of analysis in building deductive systems.

K. Alfred TARSKI. 1. Analysis of words and analysis of concepts. 2. Arbitrariness of terminological decisions. 3. The need of an “artificial” conceptual apparatus. 4. Prerequisites for defining terms. 5. Stages of the process of construction of a conceptual apparatus.

N. Izydora DĄMBSKA. 1. Fallibility of the analytical method. 2. Conceptual analysis versus logical analysis and linguistic analysis.

O. Maria KOKOSZYŃSKA. 1. Analysis of propositional functions. 2. Analysis of the expression “in respect to”.

**CHAPTER EIGHT. PARAPHRASE IN THE LWS.**

**PART ONE. CONCEPTUAL DISTINCTIONS**

**PART TWO. FRAGMENTS**

A. Kazimierz TWARDOWSKI. 1. School of reports. 2. Paraphrase in Twardowski’s argumentation. 3. Analysis of the word “nothing” as a syncategorematic expression.

C. Jan ŁUKASIEWICZ. 1. Immanent and transcendent interpretation. 2. Intuitive criterion for the adequacy of paraphrases.

D. Zygmunt ZAWIRSKI. 1. Untranslatability of languages. 2. The irreremovable ambiguity of metaphysical and scientific theses.
E. Stanisław LEŚNIEWSKI. 1. The concept of paraphrase. 2. Synonymy. 3. Adequate symbolization. 4. Symbolic paraphrase.

G. Władysław TATARKIEWICZ. 1. Requirements for a correct definitional paraphrase. 2. The function of paraphrase in the historiography of philosophy.

H. Tadeusz CZĘZOWSKI. 1. Interpretation as a semantic model. 2. Interpretation as paraphrase. 3. Paraphrase and other transformations.

I. Maria OSSOWSKA. 1. Denormativization. 2. Difficulties of adequate paraphrasing.

M. Józef M. BOCHEŃSKI. 1. Defining and paraphrasing. 2. Paraphrase as dehipostasizing.

Chapter nine. Axiomatization and formalization in the LWS. .................................. 449

Part one. Conceptual distinctions ................................................................. 449

Part two. Fragments ................................................................. 456

A. Kazimierz TWARDOWSKI. 1. The dangers of formalization. 2. Advantages and disadvantages of symbolization. 3. Consequences of symbolomania and pragmatophobia.

B. Władysław WITWICKI. 1. Example of application of the more geometrico method. 2. Axiomatization and clarity. 3. Induction as a type of deduction.

C. Jan ŁUKASIEWICZ. 1. The program of the axiomatization of philosophy. 2. Philosophical logic and mathematical logic. 3. Logic and metaphysics. 4. Interpretation of three-valued logic. 5. Two ways of justifying the theses of deductive theories. 6. Formal and formalistic system. 7. The significance of symbolic logic for scientific practice.

D. Zygmunt ZAWIRSKI. 1. Formalization. 2. Characteristics of the axiomatic method. 3. Pure and applied deductive theory. 4. Axiomatic method and metaphysics. 5. Intuition in axioma-
tized metaphysics. 6. Axiomatization in the natural sciences. 7. Stages of development of the idea of axiomatization.

E. Stanisław LEŚNIEWSKI. 1. Logic and ontology. 2. Formalism and intuitionism. 3. Visual self-evidence. 4. The meaningfulness of definitions in a deductive system.

F. Tadeusz KOTARBIŃSKI. 1. Deductive reasoning and the deductive method. 2. Deductive systems. 3. Phases of the optimization of deductive systems. 4. Formal deductive systems.

G. Władysław TATARKIEWICZ. 1. Intuitionism and formalism. 2. Deductive systems and philosophy.

I. Maria OSSOWSKA. 1. Formal systems in ethics. 2. Structure of ethical systems.

J. Kazimierz AJDUKIEWICZ. 1. Axiomatization as an analytical method. 2. Pure and applied theories. 3. Axiomatic systems and deductive systems. 4. Justifying axioms. 5. The intuitive-ness of axioms. 6. Assuming theses of logic and using the rules of deduction. 7. Formalization as a complement to axiomatization. 8. The pragmatic concept of an axiomatic system.

K. Alfred TARSKI. 1. Formal and formalized language. 2. Logical reconstruction of classical philosophical problems.

L. Janina KOTARBIŃSKA. 1. The formalistic and linguistic concept of language analysis. 2. Elements of reconstruction. 3. Constructionism.

N. Izydora DĄMBSKA. 1. Axiomatized deductive systems. 2. Laws in deductive systems.

Chapter ten. Historical-philosophical concepts and methods in the LWS . . . 498

Part one. Conceptual distinctions .................................................. 498

1. History and historiography. 2. The domain of the historiography of philosophy. 3. Historical-philosophical facts. 4. Registration, evaluation and explanation. 5. Philosopher-historian versus systematic philosopher. 6. The empirical basis of the historiography of philosophy. 7. The language of the historiography of philosophy. 8. Methods of historical-philosophical research.

Part two. Fragments ................................................................. 503

C. Jan ŁUKASIEWICZ. 1. Criticism of old philosophical systems. 2. Continuity of traditions of thought. 3. History of logic. 4. Historical and systematic reconstruction.

D. Zygmunt ZAWIRSKI. 1. History of ideas from a chronological and logical point of view. 2. The historiosophy of philosophy and science.

H. Tadeusz CZĘŻOWSKI. 1. The object of the history of philosophy. 2. Historical hypotheses. 3. The importance of historiography for systematic research.

I. Maria OSSOWSKA. 1. An analyst in front of history. 2. Gaps in the history of philosophy.

J. Kazimierz AJDUKIEWICZ. 1. Historiography in a broader and narrower sense. 2. Historiography as an idiogetic science. 3. Elements of historical research. 4. The fragmentary character of philosophical historiography. 5. The history of philosophical terms and theories.

K. Alfred TARSKI. 1. Logic and history. 2. Three directions of the development of mathematical logic. 3. Historical connections.

L. Janina KOTARBIŃSKA. 1. Radical doctrines and their liberalization. 2. Analytical and critical studies in history.

N. Izzydora DĄMBSKA. 1. Philosophy and its history. 2. The history of science and philosophical historiography. 3. Two methods for practicing philosophical historiography.

O. Maria KOKOSZYŃSKA. 1. Evolution of concepts. 2. Rejecting historical hermeneutics.

Chapter eleven. Didactic methods in the LWS .............................................. 531

Part one. Conceptual distinctions .............................................................. 531

Part two. Fragments .................................................................................... 536
A. Kazimierz TWARDOWSKI. 1. The ideal academic lecturer. 2. Philosophical seminar. 3. Philosophical Circle and Philosophical Society. 4. Philosophy in high school. 5. Necessity of knowledge of particular sciences for a philosopher.

C. Jan ŁUKASIEWICZ. 1. Development of intellectual creativity. 2. Integrated didactics. 3. The didactic value of the logical reconstruction of scientific knowledge.

D. Zygmunt ZAWIRSKI. 1. Pedagogical ideals. 2. The professor’s ideal.

E. Stanisław LEŚNIEWSKI. 1. Imperative of the provision of state-of-the-art knowledge to students. 2. Imperative of knowledge and practice of the subject taught.

I. Maria OSSOWSKA. 1. Traditional didactic methods and contributoriness. 2. The postulate of attractiveness. 3. The attitude of a dispassionate observer.

J. Kazimierz AJDUKIEWICZ. 1. Constituents of logical culture. 2. The postulate to make teaching logic practical. 3. Logical analysis of texts. 4. Tasks of an academic course of logic. 5. The methodological education of teachers.

L. Janina KOTARBIŃSKA. 1. “Reporting” and “research” lecture. 2. An ideal reader. 3. Defining in school logic.

M. Józef M. BOCHEŃSKI. 1. Values of teaching the history of philosophy. 2. The necessity of reading sources. 3. Exams. 4. The advantages of an educator.

N. Izydora DĄMBSKA. 1. The necessity of general education in logic. 2. Extra-curricular education in philosophy.

O. Maria KOKOSZYŃSKA. 1. Logic and philosophy at an ideologized university. 2. The tasks of an academic logic course. 3. The postulate to “logicize” academic studies.
